

I do not believe that the FCC should allow LPFM to take priority over FM translators. I believe that limiting what people are allowed to listen to would be a violation of our Constitution of free speech. We currently have a variety of stations on the FM translator station that allows for individuals to choose the type of programing that they listen to, of which many stations which would be eliminated.

If you chose to do so, be aware that there are many individuals out there that will quit listening to the radio all together, thereby causing the precious marketers that put advertisements on the air to lose a large segment of their "audience."
